📍 P. An Khanh, Ninh Kieu District, Can Tho City

// TARGET

I am a motivated and growth-oriented Web Developer with a strong passion for building modern web applications. Through academic and collaborative projects, I have gained hands-on experience with ASP.NET Core, React, Node.js, NestJS, SQL Server, and MongoDB. I enjoy solving technical problems, learning new technologies, and collaborating with teams to develop reliable and user-friendly software. I am eager to contribute to a professional development team while continuously improving my technical and communication skills.

// SKILL

- **Languages:**
C#, Java, JavaScript, TypeScript, HTML5, CSS3
- **Backend:**
ASP.NET Core Web API, ASP.NET Core MVC, Node.js, Express.js, NestJS, Jakarta EE, RESTful APIs, JWT Authentication
- **Frontend:**
React.js, Ant Design, Tailwind CSS, Razor Views
- **Database:**
SQL Server, MySQL, MongoDB
- **Architecture & Concepts:**
Object-Oriented Programming (OOP), MVC Architecture, Microservices, REST Architecture, Authentication & Authorization
- **Development Tools:**
Git, GitHub, Docker, Postman, Swagger, Visual Studio, VS Code, SSMS

// PROJECTS PARTICIPATED

FPT UNIVERSITY CAN THO | 01/2025 - 04/2025

[Project: Motovibe](#)

- Motovibe is a web-based motorcycle sales and management system developed as an academic project. This Java-based application streamlines motorcycle sales, customer services, and inventory management for optimal performance.

Technologies Used:

Backend: Jakarta EE, Maven

Frontend: JSP, JSTL, HTML/CSS, JavaScript

Database: Microsoft SQL Server

Other Libraries: Jakarta Servlet API, Jakarta Mail API, GSON, OpenTelemetry

Development Tools: Maven, Git, Microsoft SQL Server Management Studio

MOBIFONE SERVICE COMPANY AREA 9 | 04/2025 - 08/2025

Project: Education CRM System

- The Education CRM system is a web development project that supports the management and operation of activities related to customers, contracts, revenue, training programs, and customer care in an educational environment. The project helps optimize data management processes, improve operational efficiency, and enhance the user experience.

Technologies Used:

Backend: NestJS, TypeORM, JWT, Swagger

Frontend: React, Vite, Ant Design, Redux Toolkit, React Router

Database: MySQL

Key Features:

- Customer, contract, revenue, and training program management
- User authentication and authorization
- Reporting and administrative dashboard
- File upload/download and data export

Development Tools: Git, Visual Studio Code, Postman, Docker

FPT UNIVERSITY CAN THO | 09/2025 - 12/2025

Project: Shoe Store Website

- Shoe Store is an online e-commerce system for shoe stores, developed using ASP.NET Core MVC. This project helps manage the entire sales process, from product display, shopping cart, ordering and payment to order management and product reviews.

Technologies Used:

Backend: C#, ASP.NET Core MVC, Entity Framework Core

Frontend: HTML, CSS, JavaScript, Razor Views

Database: Microsoft SQL Server

Development Tools: Visual Studio, Git, Microsoft SQL Server Management Studio

FPT UNIVERSITY CAN THO | 01/2026 - 04/2026

Project: FutureLearn

- FutureLearn is a web-based online learning platform developed to simulate a real-world online learning system. The application provides a complete learning experience, including user authentication, course management, content delivery, registration, payment, notifications, analytics, and AI chatbot support. The solution adopts a microservices architecture to improve scalability, maintainability, and functional separation.

Technologies Used:

Backend: .NET 8, ASP.NET Core Web API, ASP.NET Core MVC

Frontend: ASP.NET Core MVC, Razor Views, HTML/CSS, JavaScript

Database: Microsoft SQL Server

Architecture: Microservices, Ocelot API Gateway

Other: JWT Authentication, Swagger, OData, AutoMapper, SignalR, Cloudinary, MailKit, Groq API

Development Tools: Visual Studio, Git, Microsoft SQL Server Management Studio, Postman

FPT UNIVERSITY CAN THO | 04/2026 - Present

Project: UniLife

- UniLife is a web-based university canteen management platform developed to digitize and optimize canteen operations for administrators, staff, and customers. The system provides a complete operational workflow, including user authentication, role-based access control, food and ingredient management, menu scheduling, order processing, kitchen queue monitoring, inventory tracking, supplier management, and notification management.

Technologies Used:

Backend: Node.js, Express.js, RESTful API

Frontend: React, Vite, Ant Design, Tailwind CSS

Database: MongoDB

Architecture: Modular backend architecture, REST API, JWT-based authentication

Development Tools: Visual Studio, Git, Postman

FPT UNIVERSITY CAN THO

Major: Software Engineering | 09/2022 - Expected 09/2026

- Completed multiple academic and team-based software projects using ASP.NET Core, React, Node.js, NestJS, SQL Server, and MongoDB.
- Gained hands-on experience in software design, database development, RESTful API implementation, version control with Git, and Agile team collaboration.

// CERTIFICATIONS

- B1 Preliminary (PET) - Cambridge University Press & Assessment | 2026
- Software Development Lifecycle Specialization - University of Minnesota (Coursera) | 2024
- User Experience Research and Design Specialization - University of Michigan (Coursera) | 2026
- English Certificate (Level C - B1 Equivalent) - FPT University Can Tho
- Project Management Principles and Practices Specialization - University of California, Irvine (Coursera) | 2025
- CertNexus Certified Ethical Emerging Technologist Professional Certificate - CertNexus (Coursera) | 2025
